

***Main Session of India AI Impact Summit***  
**Preparing for the Future: AI-Driven Strategies for Workforce and Economic Growth**  
**1.30pm – 2.25 pm: 20<sup>th</sup> February 2026**

**Venue: West Wing room 4 A, (Near Gate No. 7); Bharat Mandapam; New Delhi**

**Agenda**

AI-driven strategies can directly accelerate economic growth by improving efficiency and sparking innovation. Preparing for the future requires a shift from viewing Artificial Intelligence (AI) as a tool for automation to treating it as a strategic partner in fostering innovation, enhancing productivity, and driving economic growth. By 2030, AI could contribute significantly to the global economy, making the adoption of AI-driven strategies in the workforce a top imperative for competitive survival. AI adoption across sectors like manufacturing, healthcare, and financial services is projected to add trillions to the global economy by 2030, driven by lower costs and higher output. The integration of AI is rewriting the traditional career ladders where roles are less defined by longevity and more by a combination of human judgment and machine intelligence. Organizations are evolving through efficient use of AI, where machine speed and accuracy are paired with human empathy, contextual understanding, and moral judgment.

1330 hrs Session Moderator

**Mr Tejpreet S Chopra**  
Co-Chair, CII National AI Forum and CEO  
Industry.AI, BLP Group

Guest of Honour

**Mr Satvinder Singh**  
Deputy Secretary-General of ASEAN for  
ASEAN Economic Community, ASEAN Secretariat, Indonesia

Panelists
